### **RE: RPNY Solar 4 PILOT Application**

Dear Mr. Petrovich,

Renewable Properties is pleased to submit an updated Application for Benefits for our RPNY Solar 4, AKA "Clemons Road," Solar Project for your review and consideration. The Clemons Road Solar Project (Project) is small-scale, 2.75 MWac community solar energy generating facility that will be located on approximately 12.4 acres of a 41.9-acre parcel. The subject parcel is located at 5986 Clemons Road in the Village of Minoa, NY; (APN 005.-10-01.0). The Project company has entered into a long-term lease agreement with the property owner, RC Raimondo Properties, LLC. The Project will generate 2.75 megawatts (MW) of alternating current (AC) emission-free, clean, renewable power.

The Project will utilize approximately 6,427 modules and roughly 22 string inverters which convert the sun's energy into usable AC power. Single-access tracking technology will be utilized to allow the modules to efficiently track the sun throughout the day and maximize the efficiency of solar collection. The modules will be mounted on a steel racking system, which will be anchored into the ground using driven steel piers.

During the construction period, the Project will create up to 30 full-time construction jobs. We are aware of OCIDA's local labor requirements and are working with our engineering, procurement, and construction (EPC) prime contractor towards the 100% local labor requirement.

RPNY Solar 4 requests this PILOT because our financial modeling indicates the Project would not be feasible otherwise. Although projects of this size offer outsized community benefits, their relatively small footprint mean less of an ability to take advantage of the economies of scale available to larger projects. For those reasons, a \$4,000/MW PILOT is essential to bringing this opportunity and benefits to Onondaga County.

It should be noted that tax revenue from community solar systems have a 100% net benefit to the tax base. The Project will not burden municipal resources in any manner and therefore the tax proceeds generated from the existence of the Project have a 100% reduction on municipal expenses. Moreover, the Project will still pay any applicable special district taxes. It is respectfully submitted that almost no other applicant or taxpayer/use can make that representation. PILOT payments with a 2% contractual escalator will total \$ 11,000/year for base year up to \$17,692 in year 25 for a total of \$352,333 in payment in lieu of taxes.

Letters of support for the proposed PILOT have been obtained from the Village of Minoa, the Town of Manlius, the East Syracuse Minoa Central School District, and the Onondaga County Legislature and have been attached to this application.

Sincerely,

*\*PLEASE SEE FOLLOWING PAGE FOR OCIDA SOLAR GUIDANCE & BEST PRACTICE*

### OCIDA SOLAR PILOTs GUIDANCE AND BEST PRACTICE

To be placed on the OCIDA meeting agenda, proposed solar projects must provide OCIDA with the following in advance of the Project's first OCIDA meeting:

1. Fully completed OCIDA application.
2. Copy of Environmental Assessment Form.
3. A SEQR resolution approved by a local municipality indicating municipality will be lead agency, the type of action (I, II, or unlisted) and, if completed, the SEQR determination made by the municipality.
4. Copies of your zoning applications submitted to the local municipality.
5. Verification of parcel subdivision process with the town (if the entire parcel will not be used for the solar project).
6. A statement clarifying whether the applicant will lease or purchase the real property on which the Project is situated. If leased, provide a copy of the proposed or executed lease. If lease parcel is less than entire parcel then see 5 above.
7. A supporting document from the School District and the Town Board outlining the agreed upon cost per megawatt to be used as a basis for the PILOT. OCIDA cannot create the PILOT schedule without this information.
8. Absent a showing otherwise by the Company, deemed acceptable by the Agency in the sole and absolute discretion, the Company must close with the Agency on a project prior to consideration of any requested organizational structure or project entity ownership changes.

You will receive a draft Cost Benefit Analysis and a Draft PILOT schedule from this office. You may use these documents as your Project progresses through the OCIDA approval process. OCIDA staff are available to update these two documents as needed.

9. Is the Project part of a larger mixed-use development? Please describe.

## Section VIII: Local Access Policy Agreement

In absence of a waiver permitting otherwise, every project seeking the assistance of the Onondaga County Industrial Development Agency (Agency) must use local general contractors, sub-contractors, and labor for one-hundred percent (100%) of the construction of new, expanded, or renovated facilities. The project's construction or project manager need not be a local company.

**Noncompliance may result in the revocation and/or recapture of all benefits extended to the project by the Agency. Local Labor** is defined as laborers permanently residing in the State of New York counties of Cayuga, Cortland, Herkimer, Jefferson, Madison, Oneida, Onondaga, Oswego, Tompkins, and Wayne. **Local (General/Sub) Contractor** is defined as a contractor operating a permanent office in the State of New York counties of Cayuga, Cortland, Herkimer, Jefferson, Madison, Oneida, Onondaga, Oswego, Tompkins and Wayne. The Agency may determine on a case-by-case basis to waive the Local Access Policy for a project or for a portion of a project where consideration of warranty issues, necessity of specialized skills, significant cost differentials between local and non-local services or other compelling circumstances exist. The procedure to address a local labor waiver can be found in the OCIDA handbook, which is available upon request.

Prior to issuance of any NYS Tax & Finance ST-60 forms, the Applicant must submit a **Contractor Status Report to the Agency**.

In consideration of the extension of financial assistance by the Agency RPNY Solar 4, LLC (the Company) understands the Local Access Policy and agrees to complete Appendix C of the Agency's application at the time of the application to the Agency and as part of a request to extend the valid date of the Agency's tax-exempt certificate for the Project. The Company understands that an Agency tax-exempt certificate is typically valid for 12 months from the effective date of the project inducement and extended thereafter upon request by the Company. The Company further understands that any request for a waiver to this policy must be submitted in writing and approved by the Agency.

I agree to the conditions of this agreement and certify all information provided regarding the construction and employment activities for the project as of 1/11/2023 (date).

**RPNY Solar 4  
Clemons Road Solar Project  
Project Narrative & Description**

**Project Site**

The Clemons Road Solar Project (Project) is small-scale community solar energy generating facility that will be located on approximately 12.4 acres of a 41.9-acre parcel. The subject parcel is located at 5986 Clemons Road (APN 005.-10-01.0) in the Village of Minoa, NY, and is currently vacant with no active uses. The Project's parent company, Wildcat Renewables, LLC, has entered into a long-term lease agreement with the property owner, RC Raimondo Properties, LLC (copy of lease agreement attached), which will be transferred to RPNY Solar 4, LLC. The Project will generate 2.75 megawatts (MW) of alternating current (AC) emission-free, clean, renewable power.

**The Applicant**

RPNY Solar 4, LLC is an affiliate and subsidiary of Wildcat Renewables, LLC, a subsidiary of Renewable Properties, LLC. Renewable Properties is a national developer, financier, owner, and operator of community solar PV and energy storage projects across the country. The company currently has a development pipeline of over 600 megawatts across 12 states, with over a dozen projects in development or operating in New York alone.

**Municipal Approvals**

A full environmental assessment form (FEAF) was completed by the Project team and submitted to the Town of Manlius in December of 2021 (FEAF attached). The Village of Minoa Board of Trustees declared their intent to serve as SEQRA lead agency, classified the Project as an Unlisted Action pursuant to SEQRA and declared to conduct an uncoordinated SEQRA review of the Unlisted Action at their meeting on February 4, 2022. At their September 6, 2022, meeting, the Village of Minoa Board of Trustees issued a Negative Declaration of Significant Adverse Impact as SEQRA lead agency for the proposed Project (a copy is attached). The Project was approved to be rezoned as a Planned Development District (PDD) allowing for solar development on approximately 14.2 acres of the larger, 41.9-acre parcel (PDD graphic included). The Project received Site Plan approval from the Village of Minoa Board of Trustees on October 17, 2022 (approving resolutions attached).

**Project Description**

The Project will interconnect to National Grid's existing electrical distribution system, which is located on site. The power generated from this facility will be sold to consumers via the state's Community Distributed Generation program (commonly called community solar). This program allows customers to directly offset their energy use with local solar power while saving money on their electrical bills. According to National Energy Laboratory, only 27% of all homes in the United States can install solar panels. This statistic indicates 73% of the country's population is denied access to renewable energy. Community solar provides utility savings and renewable energy access to businesses and residents that cannot install solar panels on their building because of a lack of financial means, or because of a physical barrier to installation. Community solar lowers the barriers of access to renewable energy, making it attainable for all local residents. The Project will generate an estimated 4,842,000 kWhrs of pollution-free electricity annually, supplying roughly 432 local residences. Additionally, the Project will generate community solar credits for ninety cents on the dollar which will be credited to residents' utility invoices. Both residential and commercial customers can take advantage of the savings.

The Project will utilize approximately 6,427 modules and roughly 22 string inverters which convert the sun's energy into usable AC power. Single-access tracking technology will be utilized to allow the modules to

**Renewable Properties, LLC**

879 Sanchez Street  
San Francisco, CA 94114

[www.renewprop.com](http://www.renewprop.com)

efficiently track the sun throughout the day and maximize the efficiency of solar collection. The modules will be mounted on a steel racking system, which will be anchored into the ground using driven steel piers.

The Project will provide electric utility cost savings for Onondaga County residents and businesses. The Project will also result in increased revenues to the county and local municipal tax base, payments to the local hospitality industry, purchase of local supplies and goods, and lease revenues to the participating landowner.

During the construction period, the Project will create up to 30 full-time construction jobs. We are aware of OCIDA's local labor requirements and are working with our engineering, procurement, and construction (EPC) prime contractor towards the 100% local labor requirement.

**OCIDA Benefits Statement**

RPNY Solar 4 requests this PILOT because our financial modeling indicates the Project would not be feasible otherwise. Although projects of this size offer outsized community benefits, their relatively small footprint mean less of an ability to take advantage of the economies of scale available to larger projects. For those reasons, a \$4,000/MW PILOT is essential to bringing this opportunity and benefits to Onondaga County.

It should be noted that tax revenue from community solar systems have a 100% net benefit to the tax base. The Project will not burden municipal resources in any manner and therefore the tax proceeds generated from the existence of the Project have a 100% reduction on municipal expenses. Moreover, the Project will still pay any applicable special district taxes. It is respectfully submitted that almost no other applicant or taxpayer/use can make that representation. PILOT payments with a 2% contractual escalator will total \$ 11,000/year for base year up to \$17,692 in year 25 for a total of \$352,333 in payment in lieu of taxes.

Letters of support for the proposed PILOT have been obtained from the Village of Minoa, the Town of Manlius, the East Syracuse Minoa Central School District, and the Onondaga County Legislature and have been attached to this application.

We are excited to work with the Onondaga County Industrial Development Agency and advance this Project through to commercial operation.

Sincerely,

RENEWABLE PROPERTIES

14. EROSION CONTROL MEASURES SHOULD BE RELOCATED INWARD AS PERIMETER SLOPE CONSTRUCTION PROGRESSES AND RECONSTRUCTED TO THE NYS STANDARDS & SPECIFICATION AT THE END OF EACH DAY.
15. PERIMETER AREAS SHALL BE TEMPORARILY STABILIZED WITH SEED AND MULCH PROGRESSIVELY AT MINIMUM AT THE END OF EACH WEEK WITH 100% PERENNIAL RYEGRASS MIX AT A RATE OF 2-4 LBS PER 1000 SF AND MULCH 90-100 LBS PER 1000 SF OF WEED FREE STRAW.
16. SLOPE TRACKING SHALL BE IMPLEMENTED ON ALL SLOPE 1 ON 3 OR GREATER AT THE END OF EACH WORK DAY AND PRIOR TO FINAL SLOPE GRADING AND STABILIZATION.

SITE STABILIZATION:

1. WHEN FINAL GRADE IS ACHIEVED DURING NON-GERMINATING MONTHS, THE AREA SHOULD BE MULCHED UNTIL THE BEGINNING OF THE NEXT PLANTING SEASON.
2. MULCHES SHOULD BE APPLIED AT THE RATES SHOWN IN THE MULCH APPLICATION RATES TABLE. VERY LITTLE BARE GROUND SHOULD BE VISIBLE THROUGH THE MULCH.
3. STRAW AND HAY MULCH SHOULD BE ANCHORED OR TACKIFIED IMMEDIATELY AFTER APPLICATION TO PREVENT BEING WINDBLOWN. A TRACTOR-DRAWN IMPLEMENTS MAY BE USED TO "CRIMP" THE STRAW OR HAY INTO THE SOIL - ABOUT 3 INCHES. THIS METHOD SHOULD BE LIMITED TO SLOPES NO STEEPER THAN 3H:1V. THE MACHINERY SHOULD BE OPERATED ALONG THE CONTOUR. NOTE: CRIMPING OF HAY OR STRAW BY RUNNING OVER IT WITH TRACKED MACHINERY IS NOT RECOMMENDED.
4. BEFORE SEEDING IS APPLIED THE CONTRACTOR SHALL SPREAD SOIL TO PREVENT PONDING AND CONFIRM THAT SOIL WILL SUSTAIN THE SEED GERMINATION AND ESTABLISHMENT OF VEGETATION.
5. GRADED AND/OR COMPACTED AREAS SHOULD BE SCARIFIED OR OTHERWISE LOOSENEED TO A DEPTH OF 3 TO 5 INCHES TO PERMIT BONDING OF THE TOPSOIL TO THE SURFACE AREAS AND TO PROVIDE A ROUGHENED SURFACE TO PREVENT TOPSOIL FROM SLIDING DOWN SLOPE. COMPACTED SOILS SHOULD BE SCARIFIED TO A DEPTH OF 6 TO 12 INCHES, ALONG CONTOUR WHEREVER POSSIBLE, PRIOR TO SEEDING.
6. TOPSOIL OR AMENDED SOIL SHOULD BE UNIFORMLY DISTRIBUTED ACROSS THE DISTURBED AREA TO A MINIMUM DEPTH OF 6 INCHES. SPREADING SHOULD BE DONE IN SUCH A MANNER THAT SODDING OR SEEDING CAN PROCEED WITH A MINIMUM OF ADDITIONAL PREPARATION OR TILLAGE. IRREGULARITIES IN THE SURFACE RESULTING FROM TOPSOIL PLACEMENT SHOULD BE CORRECTED IN ORDER TO PREVENT FORMATION OF DEPRESSIONS.
7. TOPSOIL SHOULD NOT BE PLACED WHILE THE TOPSOIL OR SUBSOIL IS IN A FROZEN OR MUDDY CONDITION, WHEN THE SUBSOIL IS EXCESSIVELY WET, OR IN A CONDITION THAT MAY OTHERWISE BE DETRIMENTAL TO PROPER GRADING AND SEEDBED PREPARATION.
8. WHEN USED AS A MULCH REPLACEMENT, THE APPLICATION RATE (THICKNESS) OF THE COMPOST SHOULD BE ½" TO ¾". COMPOST SHOULD BE PLACED EVENLY AND SHOULD PROVIDE 100% SOIL COVERAGE. NO SOIL SHOULD BE VISIBLE.
9. POLYMERIC AND GUM TACKIFIERS MIXED AND APPLIED ACCORDING TO MANUFACTURER'S RECOMMENDATIONS MAY BE USED TO TACK MULCH. AVOID APPLICATION DURING RAIN AND ON WINDY DAYS. A 24-HOUR CURING PERIOD AND A SOIL TEMPERATURE HIGHER THAN 45° F ARE TYPICALLY REQUIRED. APPLICATION SHOULD GENERALLY BE HEAVIEST AT EDGES OF SEEDED AREAS AND AT CRESTS OF RIDGES AND BANKS TO PREVENT LOSS BY WIND. THE REMAINDER OF THE AREA SHOULD HAVE BINDER APPLIED UNIFORMLY. BINDERS MAY BE APPLIED AFTER MULCH IS SPREAD OR SPRAYED INTO THE MULCH AS IT IS BEING BLOWN ONTO THE SOIL. APPLYING STRAW AND BINDER TOGETHER IS GENERALLY MORE EFFECTIVE.
10. SYNTHETIC BINDERS, OR CHEMICAL BINDERS, MAY BE USED AS RECOMMENDED BY THE MANUFACTURER TO ANCHOR MULCH PROVIDED SUFFICIENT DOCUMENTATION IS PROVIDED TO SHOW THEY ARE NON-TOXIC TO NATIVE PLANT AND ANIMAL SPECIES.
11. MULCH ON SLOPES OF 8% OR STEEPER SHOULD BE HELD IN PLACE WITH NETTING. LIGHTWEIGHT PLASTIC, FIBER, OR PAPER NETS MAY BE STAPLED OVER THE MULCH ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.
12. SHREDDED PAPER HYDROMULCH SHOULD NOT BE USED ON SLOPES STEEPER THAN 5%. WOOD FIBER HYDROMULCH MAY BE APPLIED ON STEEPER SLOPES PROVIDED A TACKIFIER IS USED. THE APPLICATION RATE FOR ANY HYDROMULCH SHOULD BE 2,000 LB/ACRE AT A MINIMUM.
13. LIME, FERTILIZER, SEED, AND MULCH DISTURBED AREAS PER THE EROSION AND SEDIMENT CONTROL PLANS. IN AREAS OF STEEP SLOPES OR OBVIOUS AREAS WHERE POTENTIAL EROSION MAY OCCUR, AN EROSION CONTROL MAT OR FLEXIBLE GROWTH MEDIUM (FGM) SHALL BE USED. FGM SHALL BE APPLIED PER MANUFACTURER SPECIFICATIONS.
14. ONCE A SECTION OF THE ALIGNMENT HAS BEEN STABILIZED, NO CONSTRUCTION TRAFFIC SHALL OCCUR TO REMOVE ANY BMPS UNTIL THE SECTION HAS ACHIEVED 80% PERENNIAL VEGETATIVE COVER. AN AREA SHALL BE CONSIDERED TO HAVE ACHIEVED FINAL STABILIZATION WHEN IT HAS A MINIMUM OF 80% PERENNIAL VEGETATIVE COVER OR OTHER PERMANENT NONVEGETATIVE COVER WITH A DENSITY SUFFICIENT TO RESIST ACCELERATED EROSION AND SUBSURFACE CHARACTERISTICS SUFFICIENT TO RESIST SLIDING OR OTHER MOVEMENTS.

NOTES:

1. SOCK FABRIC AND COMPOST SHALL MEET ALL STATE STANDARDS.
2. COMPOST FILTER SOCK SHALL BE PLACED AT EXISTING LEVEL GRADE. BOTH ENDS OF THE BARRIER SHALL BE EXTENDED AT LEAST 8 FEET UP SLOPE AT 45 DEGREES TO THE MAIN BARRIER ALIGNMENT. MAXIMUM SLOPE LENGTH ABOVE ANY BARRIER SHALL NOT EXCEED THAT SPECIFIED FOR THE SIZE OF THE SOCK AND THE SLOPE OF ITS TRIBUTARY AREA.
3. TRAFFIC SHALL NOT BE PERMITTED TO CROSS COMPOST FILTER SOCKS.
4. ACCUMULATED SEDIMENT SHALL BE REMOVED WHEN IT REACHES 1/2 THE ABOVE GROUND HEIGHT OF THE BARRIER AND DISPOSED IN THE MANNER DESCRIBED ELSEWHERE IN THE PLAN.
5. COMPOST FILTER SOCKS SHALL BE INSPECTED WEEKLY AND AFTER EACH RUNOFF EVENT. DAMAGED SOCKS SHALL BE REPAIRED ACCORDING TO MANUFACTURER'S SPECIFICATIONS OR REPLACED WITHIN 24 HOURS OF INSPECTION.
6. BIODEGRADABLE COMPOST FILTER SOCKS SHALL BE REPLACED AFTER 6 MONTHS; PHOTODEGRADABLE SOCKS AFTER 1 YEAR. POLYPROPYLENE SOCKS SHALL BE REPLACED ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.
7. UPON STABILIZATION OF THE AREA TRIBUTARY TO THE SOCK, STAKES SHALL BE REMOVED. THE SOCK MAY BE LEFT IN PLACE AND VEGETATED OR REMOVED. IN THE LATTER CASE, THE MESH SHALL BE CUT OPEN AND THE MULCH SPREAD AS A SOIL SUPPLEMENT.

## PROJECT FEAF

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Agency Use Only [If applicable]

Project : \_\_\_\_\_

Date : \_\_\_\_\_

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

<b>1. Impact on Land</b> Proposed action may involve construction on, or physical alteration of, _____ <input type="checkbox"/> NO <input checked="" type="checkbox"/> YES the land surface of the proposed site. (See Part 1. D.1) <i>If “Yes”, answer questions a - j. If “No”, move on to Section 2.</i>

d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.	D2a	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. The proposed action may involve construction that continues for more than one year or in multiple phases.	D1e	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).	D2e, D2q	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g. The proposed action is, or may be, located within a Coastal Erosion hazard area.	B1i	<input checked="" type="checkbox"/>	<input type="checkbox"/>
h. Other impacts: _____		<input type="checkbox"/>	<input type="checkbox"/>

**2. Impact on Geological Features**

The proposed action may result in the modification or destruction of, or inhibit access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g)

***Full Environmental Assessment Form***  
***Part 3 - Evaluation of the Magnitude and Importance of Project Impacts***  
***and***  
***Determination of Significance***

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Please refer to the attached narrative.

The following resolution as drafted and proposed by the Village Attorney, was moved, seconded and adopted:

**WHEREAS**, RPNY Solar 4, LLC (the “Applicant”) requested a zoning change from Residential A-1 to a Planned Development District (“PDD”) for the development of a solar energy generating facility (the “Project”) at 5986 Clemons Road, in the Village of Minoa, in Onondaga County (Tax Map Id: 005.-10-01.0)(the “Site”);

**WHEREAS**, in accordance with Step 1 of the PDD procedures pursuant to Village Code § 160-13.1(D), the Village Board accepted the Applicant’s concept plan and outline for the Project and referred the Project materials to the Village of Minoa Planning Board (the “Planning Board”); and

**WHEREAS**, the Planning Board completed its Step 1 review of the Project application, provided its advisory opinion and written report to the Village Board, and recommended approval of the Applicant’s concept plan and outline; and

**WHEREAS**, at the February 4, 2022 meeting, the Village Board issued a Notice of Intent to act as Lead Agency for purposes of reviewing the Project under the State Environmental Quality Review Act (“SEQRA”); and

**WHEREAS**, pursuant to Village Code § 160-13.1(D), at the May 16, 2022 meeting, the Village Board accepted the concept plan and outline of the Project subject to modification based upon the Planning Board's comments as documented in their advisory opinion to the Village Board. Pursuant to Village Code § 160-13.1(E), the Village Board transferred the Project application to the Planning Board for Step 2 PDD Project Plan review and the Planning Board's recommendation that the revised layout and access road satisfied the safety related and traffic concerns expressed during the course of its review; and

**WHEREAS**, the Planning Board substantively reviewed the modified Site Plan dated June 2, 2022, which resulted in the Applicant moving the primary access point to the Project to the Planning Board's proposed temporary access point, and determined that the June 2, 2022 Site Plan sufficiently addressed the Planning Board's concerns regarding safety and traffic. Pursuant to Village Code § 160-13.1(E), the Planning Board also performed a thorough analysis of the environmental issues related to the Project to advise the Village Board on its SEQRA determination; and

**WHEREAS**, at the June 7, 2022 meeting, the Planning Board approved the Step 2 Project Plan, and recommended that the Village Board, upon its completion of SEQRA review, adopt a negative declaration where the preparation of a draft environmental impact statement would not be necessary; and

**WHEREAS**, pursuant to Village Code § 160-13.1(F) and part of Step 3 PDD adoption, the Village Board thoroughly reviewed and examined the known facts related to the Project and carefully reviewed all potentially adverse environmental impacts, and the entire record and proceedings related to the Project. The Village Board determined that the Project will not have a significant adverse impact on the environment, adopted a negative declaration, and determined that preparation of a draft environmental impact statement is not necessary; and

**WHEREAS**, the Village Board conducted a duly noticed public hearing on the rezoning Local Law and Project Plan of 5986 Clemons Road, Minoa, NY, Tax Map Id: 005.-10-01.0 from Residential A-1 to a Planned Development District;

Dear Supervisor Deer:

This office represents RPNY Solar 4, LLC ("RPNY Solar"). The Village of Minoa (the "Village") has approved RPNY Solar to build and operate an approximately 3 megawatt solar array in the Village at 5986 Clemons Road, East Syracuse, NY 13057 (Tax Map ID: 005.-10-01.0)(the "Project").

RPNY Solar will enter into a payment in lieu of taxes ("PILOT") agreement with the Onondaga County Industrial Development Agency (the "IDA") to benefit the Onondaga County, East Syracuse Minoa Central School District, Village of Minoa, and your Town (the "Jurisdictions"). One of the IDA's requirements is that RPNY Solar obtains each Jurisdiction's approval of the proposed PILOT structure with the IDA.

RPNY Solar proposes a PILOT amount of \$4,000/MW to be split with each Jurisdiction based upon each Jurisdiction's appropriate tax rate. The PILOT agreement will last for a term of 25 years with an annual escalator of 2%. Enclosed is Mayor Brazill's letter of support for this PILOT structure. If the Town agrees to this PILOT structure, we would appreciate if you sign a copy of this letter where indicated, and return it to the undersigned.

Dear Director Petrovich:

Re: Minoa's support of RPNY Solar 4, LLC Onondaga County IDA PILOT

On September 6, 2022, the Village of Minoa (the "Village") approved RPNY Solar 4, LLC (RPNY Solar) to build and operate an approximately 3 megawatt (MW) solar array in the Village at 5986 Clemons Road, Tax Map ID: 005.-10-01.0. The Village is aware that RPNY Solar will pursue a Payment in Lieu of Taxes (PILOT) Agreement through the Onondaga County Industrial Development Agency and has discussed the proposed PILOT structure with RPNY Solar. The Village agrees with a \$4,000 per megawatt payment for a 25-year term with an annual escalator of 2%.

Please contact my office if you would like to discuss the PILOT structure further.

Sincerely,

William F. Brazill, Mayor
